

7. CONTENTS

Preface	2
1. Introduction	3
1.1. Definitions and basic terms	3
2. Kinematics of A point	4
2.1. Rectilinear motion of a point	4
2.2. Curvilinear motion of a point	11
2.2.1. Rectangular coordinate system	13
2.2.2. Cylindrical coordinate system.....	27
2.2.3. Natural coordinate system	32
3. Kinematics of A body.....	38
3.1. Motion of a rigid body in plane	38
3.1.1. Translational motion of a body	39
3.1.2. Rotational motion of a body	40
3.1.3. General plane motion of a body.....	43
3.2. Spherical motion of a body.....	52
3.3. General spatial motion of a body.....	60
4. Kinematics of the concurrent motions of points and bodies	64
4.1. Relations among kinematic quantities	64
4.2. Basic decomposition of motion	73
4.3. Three and more concurrent motions	78
5. Kinematics of plane mechanisms	81
5.1. Basic terms	81
5.2. Analytic kinematic solution of mechanisms.....	85
6. Mechanisms with constant gear ratio.....	94
6.1. Basic terms	94
6.2. Kinematic solution of trivial gear trains.....	96
6.3. Kinematic solution of planetary gear trains.....	99
Literature.....	102
Contents.....	103
