

TABLE OF CONTENT

CHAPTER I. MODELING OF POLYMER PROCESSING	7
1. <i>Fedasiuk D., Gavrysh V., Dulebová L.</i> : The investigation of temperature regimes in thermo sensitive plastic structures with thermoactive metallic inclusion.....	9
2. <i>Jachowicz T., Gajdoš I., Moravskiy V.</i> : Numerical modeling of cooling conditions of thermoplastic injection-molded parts	31
3. <i>Sikora J. W., Duleba B., Fedasiuk D.</i> : Optimization of polymer plasticizing process	50
4. <i>Duleba B., Greškovič F., Spišák E.</i> : Analysis of carbon/epoxy composite parts by simulation and mechanical testing	65
CHAPTER II. POLY(VINYL CHLORIDE) COMPOSITES	77
1. <i>Samujło B., Sikora J. W., Greškovič F.</i> : Selection of the appropriate geometrical characteristics of granules to feed single screw plasticizing system	79
2. <i>Levytskyi V., Laruk Y., Samoiliuk D., Humenetskyi T.</i> : Modified poly(vinyl chloride) and polyester composites with polymer-inorganic fillers	92
3. <i>Krasinskyi V., Suberlyak O., Klym Y., Gajdos I., Jachowicz T.</i> : Nanocomposites on the basis of thermoplastics and montmorillonite modified by polyvinylpyrrolidone	103
4. <i>Moravskiy V., Garbacz T., Duleba B., Tymkiv I.</i> : Metal-containing thermoplastic polyvinylchloride composites	113
5. <i>Garbacz T., Krasinsky V., Gerlach H.</i> : Testing of selected sorptive-diffusive properties of extruded polymer composites	127
CHAPTER III. POLYPROPYLENE COMPOSITES	139
1. <i>Tor-Świątek A., Krasinskyi V., Markovicova L.</i> : Characteristics of selected physical properties of injected polymer composites	141
2. <i>Dulebová L., Tor-Świątek A., Moravskiy V.</i> : Effects of ageing on selected properties of composites within PP matrix	156
3. <i>Duleba B., Samujło B., Suberlyak O.</i> : Construction modifications of plastic molded parts for enhancement of quality	168
4. <i>Gajdoš I., Spišák E., Krasinskyi V.</i> : Injection mold for preparation of tensile test specimens from composites with weldline	181
5. <i>Levytskyi V., Masyuk A., Chekaylo M.</i> : Regularities of obtaining and properties of polymer-silicate materials for filling thermoplastic composites	192
